ANDERSON SUÁREZ

SYSTEMS ENGINEER | FULL STACK DEVELOPER

+57 318 878 5198 • titusandersonsuarez@gmail.com • Colombia • Portfolio • GitHub • LinkedIn

PROFESSIONAL SUMMARY

Systems Engineer with experience developing scalable web applications for the healthcare sector in Colombia. Specialized in backend development with Java (Spring Boot) and relational and non-relational databases, with solid knowledge of frontend (Angular, React), enterprise reporting and DevOps practices (Docker, CI/CD). Experienced in Agile methodologies (Scrum) and software built under healthcare standards.

WORK EXPERIENCE

Junior Developer | **CreandoSoft — Colombia** August 2024 – December 2025

Contractor (Aug – Dec 2024) · Fixed-term contract renewed quarterly (Jan – Dec 2025)

- Designed, developed and maintained critical modules for a healthcare web platform used by healthcare providers (EPS and IPS) in Colombia, ensuring high availability and compliance with health regulations.
- Optimized SQL queries and backend components with Java and Spring Boot, improving performance and response times of key features.
- Designed and integrated dynamic enterprise reports with JasperReports and Crystal Reports for operational and clinical workflows.
- Implemented new frontend features with JavaScript and refactored legacy code to improve the experience of healthcare professionals.
- Worked in Scrum teams (dailies, plannings and retrospectives) delivering on time in bi-weekly sprints; wrote unit tests and technical documentation.

KEY PROJECTS

BarberHub — multitenant booking SaaS View code

Java 21 · Spring Boot · Angular · PostgreSQL · Docker

Platform where each barbershop gets its own booking page and admin panel, isolated per tenant with Hibernate. Prevents double bookings with pessimistic locking and a PostgreSQL EXCLUDE constraint; JWT roles and 19 integration tests.

Nogal — store and back office for a furniture factory View code

.NET 9 · React · TypeScript · PostgreSQL · Docker

Real system for a family business: catalog with 3D AR viewer, cart, Wompi payments and an AI assistant (Gemini), plus a back office with sales dashboard, orders, production and inventory. CI with GitHub Actions.

Medical Prescriptions System View code

NestJS · Next.js · Prisma · PostgreSQL · Docker

Prescription issuing and redemption with 3 JWT-isolated roles, PDFs with QR codes, a metrics dashboard and one-command Docker setup.

LeadGym AI — AI agents for lead generation View code

C# · .NET 8 · Semantic Kernel · Gemini API

Orchestrated agents that find local gyms, audit their online presence and write a personalized sales email.

TECHNICAL SKILLS

Languages:	Java, C#, TypeScript, JavaScript, SQL
Frameworks & Libs:	Spring Boot, .NET Core, Angular, React, Next.js, NestJS, Windows Forms
Databases:	PostgreSQL, MySQL, SQL Server, MongoDB
DevOps & Tools:	Docker, GitHub Actions, Git, JasperReports, Crystal Reports, Apache Kafka, AWS, Postman
Methodologies:	Scrum, Agile, Kanban

EDUCATION & LANGUAGES

B.S. in Systems Engineering (Graduated) | Unidades Tecnológicas de Santander (UTS) 2021 – 2026

Languages: Spanish (Native) • English (Intermediate - B1)
