- Java, Spring, Spring Boot, C#, .NET
- Intermediate English

WORK EXPERIENCE

systems engineer

CreandoSoft , AUGUST 2024 - JANUARY 2026

Junior Developer in charge of maintaining and enhancing a healthcare web application used by EPS and IPS, helping keep it running smoothly and improving the experience of end users. I supported the creation of new modules and the improvement of existing ones, contributing to important processes in the health field. I used technologies such as Java, Spring Boot, SQL, and JavaScript, along with good practices like Git version control, basic unit testing, and technical documentation. I worked within agile methods (Scrum), actively joining daily meetings, planning, and retrospectives, encouraging strong collaboration among teams. I am known for my eagerness to learn, strong communication, adaptability, and teamwork, adding value to tech projects in the healthcare area.
